

Integrated Pest Management Module *Getting Started Guide*

The Integrated Pest Management Module is an optional module that can be added on to an existing WeatherLink® installation.

It is compatible with all versions of WeatherLink 5.5 or later on computers running Windows XP or later.

Before installing this software, make sure WeatherLink has been installed on your computer. See the *WeatherLink Getting Started Guide* for instructions.

Close WeatherLink before installing the Pest Management Module.

Install the Software

1. Place the Integrated Pest Management Module software CD in your CD ROM drive.

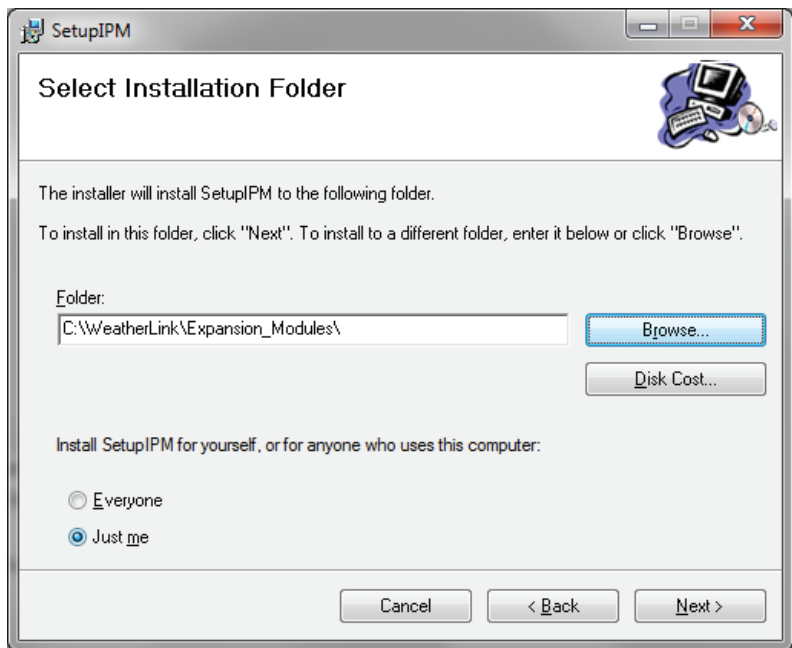

The install program should start automatically. If the install program does not start, select **Run** from the **Start** menu, type D:\SETUP (or the correct letter for your CD ROM drive), and click **OK** to begin the installation.

Davis Instruments®

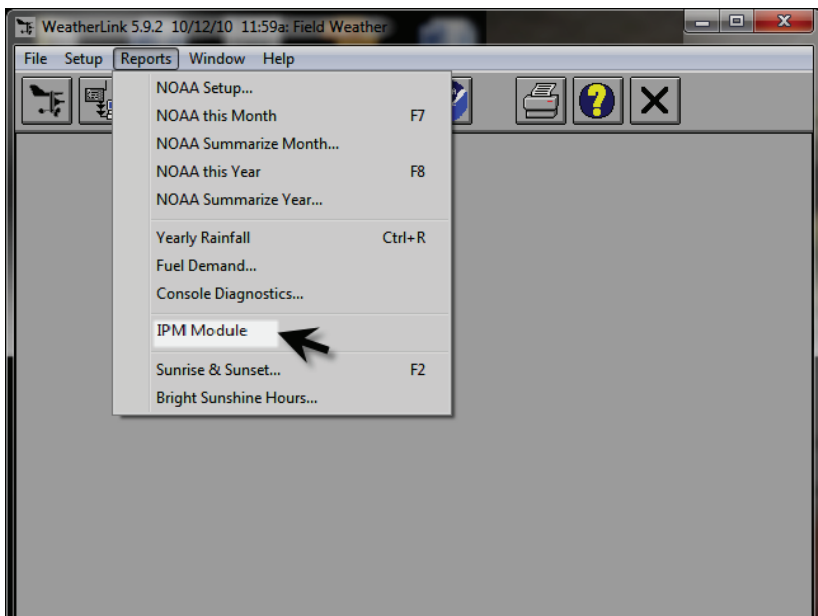

3465 Diablo Avenue, Hayward, CA 94545 USA

2. Review the license agreement, click **I Agree**, and then click **Next**.
3. The **Select Installation Folder** dialog box displays.

Make sure the folder specified is the Expansion Module folder in WeatherLink. Click **Next**. Successful installation will be confirmed.

4. Open WeatherLink. Click on **Reports** in the WeatherLink menu bar, and click on **Pest Module**.

The Integrated Pest Management Module setup screen opens. Click the Help button on bottom right of the page to learn how to use your software and tailor it to your needs.

Contacting Davis Technical Support

If you have questions about the software, or encounter problems installing or using the software, please contact Davis Technical Support. Most questions can be answered on the phone.

Note: Sorry we are unable to accept collect calls.
